

having been ginned, has been subjected to a cleaning process and then baled.

(5) *Repacked cotton.* Cotton that is composed of factors', brokers', or other samples, or of loose or miscellaneous lots collected and rebaled, or cotton in a bale which is composed of cotton from two or more smaller bales or parts of bales.

(6) *False packed cotton.* Cotton in a bale (i) containing substances entirely foreign to cotton, (ii) containing damaged cotton in the interior with or without any indication of such damage upon the exterior, (iii) composed of good cotton upon the exterior and decidedly inferior cotton in the interior in such manner as not to be detected by customary examination—that is, a plated bale, or (iv) containing pickings or linters worked into the bale.

(7) *Mixed packed cotton.* Cotton in a bale which, in the samples drawn therefrom, shows (i) a difference of three or more grades, or (ii) a difference of three or more color gradations, or (iii) a difference of two or more grades and two or more color gradations, or (iv) a difference in length of staple of one-eighth inch or more.

(8) *Water packed cotton.* Cotton in a bale that has been penetrated by water during the baling process, causing damage to the fiber, or a bale that through exposure to the weather or by other means, while apparently dry on the exterior, has been damaged by water in the interior.

§ 735.71 Class based on inspection and sample.

Whenever the grade or other class of cotton is required to be, or is, stated by a warehouseman or a classifier or board of cotton examiners for the purposes of the act or the regulations in this part, it shall be based upon a careful inspection of and a sample properly drawn from the cotton. Samples submitted to a board of cotton examiners for issuance of Form A memorandums and samples from which classification is to be determined by licensed classifiers for purposes of the Act and the regulations in this part shall be drawn by samplers licensed under the Act and said regulations and in accordance with § 735.72.

§ 735.72 Samples.

Each sample shall be approximately 6 ounces in weight, not less than 3 ounces of which are to be drawn from each side of the bale. Each sample must be representative of the bale from which drawn. Samples shall not be dressed or trimmed and shall be carefully handled in such manner as not to cause loss of leaf, sand, or other material, or otherwise change their representative character. Any sample which does not meet these requirements may be rejected.

§ 735.73 Lower grade (of two samples) to determine classification.

If a sample drawn from one portion of a bale is lower in grade or shorter in length than one drawn from another portion of such bale, the classification of the bale shall be that of the sample showing the lower grade or shorter length.

§ 735.74 Access to official cotton standards.

Each licensed warehouseman and each licensed classifier shall keep himself provided with, or have access to, a set of practical forms of the official cotton standards of the United States, or such parts thereof as the Administrator may deem necessary for use in the locality in which the licensed warehouse is located.

COTTON APPEALS

§ 735.75 Who may appeal.

Whenever the grade or other class of cotton, for which official cotton standards of the United States are in effect, is stated on a receipt or a cotton class certificate issued under the act and the regulations in this part, and a question arises as to the true grade or other class of such cotton, any person having an interest in the cotton may take an appeal for the determination of such question.

§ 735.76 Complaint.

In order to take such an appeal a complaint in writing in accordance with § 735.77 shall be filed with a duly authorized cotton examiner or a board
